Title: Intro to CSS

Screenshot: HTML Source Code

The screenshot shows a code editor with a file explorer on the left and a code editor on the right. The file explorer shows a project structure with folders for lab6, lab7, lab8, lab9, lab10, and slack screenshots. The code editor shows the HTML source code for a page titled "Lab 7: Intro to CSS". The code includes a head section with three link tags for site.css, lab.css, and index.css. The body section contains a content div with a h1 heading "Lab 7: Intro to CSS", a challenge section with a h2 heading "Challenge" and a paragraph about creating a lab7 index and style it using CSS, a problems section with a h2 heading "Problems" and a paragraph about problems encountered while doing the lab, a results section with a h2 heading "Results" and a paragraph about solving the problems, and a screenshots section with a h2 heading "Screenshots", a h3 heading "CST 322 Primitive Blockmesh", an image tag for "country_club_blockmesh.png", and a h2 heading "Back to Homepage".

```

Summary of Efforts: In lab 7 we learned to style pages through css coding. I learned a lot by coping code and altering the values to learn what did what; I'm hoping I can keep learning about it until I can type that code myself. I was a little stuck on what to do at the beginning of the assignment but I think I have a slight grasp of CSS now.
